CMPS 350 Web Development

Assignment 1

Deadline Wednesday Feb 28 @ 11:59PM

Replicate the following website using the HTML and CSS concepts that you have practiced in the Lab 1, 2 and 3. You may use any font, images, or background of your choice, as long as the page design closely resembles the example.

Here are the specific requirements:

1. The page should use the HTML 5 Sematic tags that you have seen in the previous labs.
2. Utilize flexbox to define the layout of activites cards and the page navigation where appropriate.
3. Use grid for the over all page layout and also wherever you see it appropriate.
4. Use the **RAM** technique to generate the Tags
5. Add icons to the website using font-awesome.

What is provided

1. The project skeleton code has already been provided, so you do not need to create any new files. Simply copy the project into your repository/assignments/assignment1 folder.
2. Open the computing club folder in VS Code and solve. Once done, push your code to github before the deadline.

Note :Click on this link to see the [Application Demo video](#)

After you complete the lab:

1. Fill in the *TestingDoc-Grading-Sheet.docx* and save it inside *Assignments/Assignment 1* folder with the project
2. Sync your repository to push your work to GitHub.
3. No late submissions will be accepted.
4. Not submitting the testing sheet will incur a 10% deduction
